

Because We Know Pets Are Family Too...

Rincon Valley Fire Protection District fire engines are now equipped with special pet-sized oxygen masks that will help us revive people's precious pets that have been overcome by smoke. These masks come in three sizes, small-large, that will fit everything from a hamster to a Rottweiler. The masks come in a kit created and sold by Wag'n Pet Enterprises (wagn4you.com). They were donated to the department by the Firefighters Association and retired Volunteer Lieutenant, Don Johannsen; no taxpayer funds were used.
